List of Figures	ix
List of Abbreviations.....	xi
1. Introduction: Interdisciplinary and Multiscalar Ethnohistorical Archeology	1
1.1 ‘Small Worlds’ towards Modeling Evanescent and Permanent Markets	1
1.2 Interdisciplinary Methods: Historical, Archeological, Ethnological, and Geographical/Spatial, Remote Sensing Studies	7
1.3 A Multiscalar Approach to Examining Complex Regional Production and Trade Networks.....	7
1.4 Overview of Book.....	7
1.5 Significance of this Book	8
2. Background: Northwestern Luzon Production and Trade Systems – An Overview through Ethnohistory and Archeology	9
2.1 Gold and Other Mining and Production Networks Elsewhere in the World.....	9
2.2 Philippine Islands Societies in the Tenth–Sixteenth Centuries and the Seventeenth–Twentieth Centuries Colonial World: A Brief History of Origins and Coastal–Upland Interactions.....	10
2.3 Northwestern Luzon Social, Political, and Economic Patterns of the Early Historic and Colonial Periods: An Overview of What We Know from Ethnohistory and Archeology.....	11
2.3.1 At the Time of Spanish Contact.....	15
2.3.2 Flexibility as Resilience	16
2.4 Chapter Summary.....	17
3. Historically and Archeologically Documented Networks for Gold Working And Coastal Markets in Northwestern Luzon	19
3.1 The Tonglo Network Linking the Mines of Balatok and Acupan with the Coast of Aringay and Agoo	19
3.1.1 Aringay and Agoo Evanescent Markets	19
3.1.2 Tonglo, Gold Bulking Village	21
3.2 The Gasweling Network Linking Apayao, Locjo, Cabcaben, and Catampan Mines with Calincamasan, Baratao, and Bauang on the Coast.....	21
3.2.1 Some Ethnohistorically Documented Settlements in the Gasweling Network	21
3.2.2 Juan de Salcedo 1572 Account of His Conquest of Northwestern Luzon.....	25
3.2.3 Alonso Quirante 1624 Account of His Expeditionary Force to Benguet and the Assaying of Gold Nuggets	26
3.3 The Lepanto Network – Apayao and Danac linking Lepanto Mines with Tagudin and Purao.....	29
3.3.1 Lepanto Mines as the Oldest Worked Mine in the Cordilleras	29
3.3.2 Purao and Tagudin Coastal Settlements	29
3.3.3 Danac and Apayao Bulking Stations	32
3.4 Angaqui Network Linking Patiacan/Minlaoi and Possibly Lepanto Mines with Dumaquaque and Candon in the Coastal Account	32
3.4.1 Ilocano Sampans Loaded with Gold Headed for China and Porcelain on its Return Trip.....	32
3.4.2 Gold from the Ilocos Coastline	37
3.4.3 Ethnohistorical Accounts of the Slave-for-Gold Exchange and Strategic Trade Alliance Formation	37
3.4.4 Overland, Riverine, and Maritime Trade Routes of the Angaqui Network.....	38
3.4.5 Ethnohistorically and Archeologically Documented Settlements of the Angaqui Network	39
3.5 The Abra Network as the Epitome of a More Permanent Market System in Northwestern Luzon.....	50
3.5.1 Tingguian/Itneg of Abra and Their Accounts on Early Gold	50
3.5.2 Coastal Port Settlements of Santa Maria, Narvacan, Vigan/Caoayan, Magsingal, Cabugao- Nagsingcaoan, and Calanutian.....	54
3.5.3 Bangued, Tayum, Bucao, Lagang-ilang Bulking Stations and the Tineg Jump-off Point to Cagayan Valley in the East	57
3.6 Chapter Summary.....	57

4. Theoretical Trade Models for Multiscalar Archeology: Social Network Analysis, Worlds Systems, Interaction Spheres, and Agency	65
4.1 Social Network Analysis	65
4.2 Multiscalar Interaction: Models from World Systems, Social Network Analysis, Interaction Spheres, and Agency Theory	66
4.2.1 World Systems Theory, implications for archeology	67
4.2.2 World Systems Analysis	68
4.2.3 Negotiated Peripherality	69
4.2.4 Multiscalar Approach	70
4.2.5 Trade Diaspora, Distance Parity Model	70
4.2.6 Regional/Multiscalar Studies of Lowland–Upland trade in Philippine and Southeast Asian archeology	71
4.2.7 Agency-Reciprocity, Utang Na Loob	72
4.3 Chapter Summary	72
5. Methods in Identifying Transportation and Probable Transportation Routes through Spatial Analysis	75
5.1 Importance of trails and transportation routes in ancient settlements	75
5.2 Tried and tested approaches to identifying trails	77
5.3 Geographic Information Systems and Its Utility in Modeling Trails and Transportation Networks	80
5.4 Geographic Information Systems and Remote Sensing Methods for the Tonglo Region	81
5.5 Methods used for Gasweling Region	83
5.6 Methods used for Lepanto Region	83
5.7 Methods for the Angaqui Region	86
5.8 Method Used in Abra Region	86
5.9 Modeling <i>reduccion</i> and Trade Connections through Social Network Analysis	89
5.10 Chapter Summary	90
6. Discussing the Results of Ethnohistorical Archeology and How it Relates to the GIS Analysis and Remote Sensing	93
6.1 Tonglo	93
6.2 Gasweling	93
6.3 Lepanto	94
6.4 Angaqui	95
6.5 Abra	99
6.6 Abra Northeast Branch SNA	105
6.6.1 Reduccion and inter-settlement trade – the Northeastern Abra River Branch	105
6.7 Chapter Summary	105
7. Conclusion: From Agency to Marginality in the Dynamic Gold Trading of Northwestern Luzon	107
Bibliography	111
