List of Figures.....	xi
List of Tables.....	xv
Abstract.....	xvii
Foreword.....	xviii
1. Introduction.....	1
1.1. Research question development.....	1
1.2. Previous study about the origin of agriculture in China	1
1.3. Cultural ecology as the theoretical background to investigate the origin of agriculture	3
1.4. Land-use: a key for exploring human’s subsistence strategy across the transition to agriculture	4
1.5. Reader’s roadmap	5
2. Spatial and temporal framework of the study and the characteristics of pottery and lithic assemblages	7
2.1. Geographical settings.....	7
2.1.1. The environmental conditions of the studied area	7
2.1.2. The general land-use pattern in historical period and today	9
2.1.3. The marginality for agriculture	9
2.2. The temporal span for the study.....	9
2.3. Pottery typology and chronology	11
2.3.1. Early Neolithic pottery typology	11
2.3.2. Mid Neolithic pottery typology	12
2.3.3. Late Neolithic pottery typology	14
2.3.4. Early Bronze Age pottery typology	14
2.5. The features and classification of lithic artifacts.....	16
3. Materials and methods	25
3.1. Technological organization	25
3.2. The analysis of the excavation data	26
3.2.1. The introduction of the two excavated sites and excavation methods.....	26
3.2.2. Analysis of the excavated data	28
3.3. The analysis of the survey data.....	30
3.3.1. Introduction of the field survey.....	30
3.3.2. Analysis of the survey data	31
3.4. Two-tiered comparison	32
3.5. Statistics methods used in the study	32
4. Early Neolithic land-use patterns: Excavation data analysis	35
4.1. The comparison of lithic assemblage between the Yumin and Simagou site	35
4.2. The forms and designs of the lithic tools	37
4.3. The distributional patterns of lithics inside and outside the pit houses	41
4.4. The inter-household differentiations of the lithic assemblage	43
4.4.1. The proportional distribution of different tools across the houses.....	44
4.4.2. The analysis of debitage across the houses of the Yumin and Simagou site.....	49
4.5. Additional sources of evidence illustrating the land use pattern in the Early Neolithic	52
4.6. Discussion and conclusion.....	54
5. Early Neolithic land-use patterns: Survey data analysis.....	57
5.1. The comparison of the survey and excavation data	57
5.2. Inter-site variations of the survey data.....	59
5.2.1. Site types: the conceptual frame to inspect inter-site variations.....	59
5.2.2. Samples and attributes used for evaluating the inter-site variations	59
5.2.3. The identification of the residential sites	61
5.2.4. The task sites	69
5.3. Variations of the subsistence practice across the sites	70
5.4. Correlations between sites and environmental settings	70

5.4.1. Paleoenvironment and resource distributions of the survey region	70
5.4.2. The geographic landforms and the site locational choices	76
5.4.2.1. The relative occupational intensity in different landforms	76
5.4.2.2. The proximity to the mountainous area	79
5.4.2.3. The altitude differences around the sites.....	80
5.4.2.4. The aspects of the sites.....	81
5.4.2.5. Site distributional pattern.....	82
5.5. Summary	84
6. Land use patterns of Mid-Late Neolithic/Early Bronze Age: Survey data analysis.....	87
6.1. Technological organization of lithic tools.....	87
6.1.1. Features of technological organization in general	87
6.1.2. The prevalence of the bifaces.....	87
6.1.3. The prevalence of facial retouch technique	89
6.1.4. The prevalence of arrowhead.....	89
6.1.5. The miniaturization of the chipped lithic tools	89
6.1.6. The reduced size of grinding stones.....	92
6.1.7. The changes in raw materials.....	92
6.1.8. Summary: the implications of changing technological organization.....	92
6.2. Inter-site variations of the survey data.....	93
6.2.1. The features of the main residential settlement	93
6.2.2. Site types.....	94
6.3. Variations of the subsistence practice across the sites	99
6.4. Correlations between sites and environmental settings	104
6.4.1. The geographic landforms and the site locational choices	104
6.4.2. The proximity to the mountainous area	105
6.4.3. The altitude differences around the sites.....	106
6.4.4. The aspects of the sites.....	108
6.4.5. Site distributional pattern.....	108
6.5. Conclusion	108
7. The comparison of land-use pattern between Early Neolithic and Mid-Late Neolithic/Early Bronze Age	111
7.1. The comparison of mobility pattern.....	111
7.2. The comparison of the subsistence practice.....	111
7.3. The comparison of the levels of social integration	113
7.4. Difference of site distribution across the landscape.....	113
7.5. Environmental factors which affect the changes of land-use strategy	116
8. Discussion and conclusion	119
8.1. Patterns of land use and subsistence	119
8.2. Farming as a supplementary means of the subsistence system.....	119
8.3. Hunting-Gathering under the condition of Holocene Climatic Optimum	120
8.4. Divergent pathways of the development of subsistence practice: Sticking to the mixed economy with modifications or stepping into intensive agriculture.....	121
8.5. Reconstructing the subsistence strategy from the land-use pattern	122
8.6. Future research directions	122
Bibliography	125
