List of Figures	xi
List of Tables	xv
Preface	xvii
Abstract	xix
Résumé	xx
1. Geological complexity, biogeographical realms and early human adaptations in Island Southeast Asia	1
1.1. Southeast Asian landscapes.....	1
1.1.1. Geology, geography and biogeography	1
1.1.2. The Sunda and the Sahul Shelf	1
1.1.3. Wallacea and the Philippines	2
1.2. Human prehistory and migration dynamics in Island Southeast Asia	3
1.2.1. Prehistoric human settlements	3
1.2.2. Migration hypotheses and recent least-cost pathway models.....	3
1.3. Human cultural adaptation in Island Southeast Asia	4
1.3.1. Towards a new definition of “modern behavior”?	4
1.3.2. The “generalist-specialist niche”	5
2. Navigating Island Southeast Asian waters: Marine environments, biodiversity and fishing traditions	7
2.1. Southeast Asian seascapes	7
2.1.1. Marine environments	7
2.1.2. The Coral Triangle: A hotspot of marine biodiversity	8
2.2. Fish and archaeology	9
2.2.1. Fish evolution, adaptations, and ecological dynamics.....	9
2.2.2. Ichthyoarchaeology: Deciphering past societies through fish remains.....	10
2.2.3. Advancements in Pacific fishbone analysis.....	10
2.3. Fishing traditions in the Pacific and Island Southeast Asia	10
2.3.1. Insights from Pacific Oceanian ethnology and archaeology.....	10
2.3.2. Fishing in Island Southeast Asia	13
2.3.2.1. The Paleolithic and Neolithic archaeological record.....	13
2.3.2.2. Insights from ethnology and archaeology	13
3. The Mindoro sites, Philippines	15
3.1. Geographical and geological context.....	15
3.2. Bubog I.....	15
3.3. Bubog II	18
3.4. Bilat Cave.....	20
4. The Lesser Sunda Islands sites	23
4.1. Geographical and geological context: the islands of Kisar and Timor	23
4.2. Here Sorot Entapa (HSE).....	23
4.3. Asitau Kuru	26
4.4. Matja Kuru 2	28
4.5. Laili	30
5. Zooarchaeology and ichthyoarchaeology	33
5.1. Recovery procedures and material.....	33
5.2. Comparative anatomy	33
5.2.1. Remarks	33
5.2.2. Reference collections	34
5.3. Quantifications	34
5.3.1. Number of remains (NR) and number of identified specimens (NISP).....	34
5.3.2. Minimum number of individuals (MNI).....	34
5.3.3. Minimum number of elements (MNE)	35
5.3.4. Fragmentation ratio (FR)	35

5.4. Analysis of cultural and taphonomic disturbances.....	35
5.5. Rarefaction, richness, diversity, evenness and correspondence analysis (CA).....	35
6. Findings and observations.....	37
6.1. The Mindoro sites	37
6.2. The Lesser Sunda Islands sites.....	46
7. Foraged aquatic environments through time and space	69
7.1. The Mindoro sites	69
7.1.1. Bubog I.....	69
7.1.2. Bubog II	69
7.1.3. Bilat Cave.....	72
7.2. The Lesser Sunda Islands sites.....	73
7.2.1. Here Sorot Entapa (HSE).....	73
7.2.2. Asitau Kuru	74
7.2.3. Matja Kuru 2	75
7.2.4. Laili.....	75
7.3. A local exploitation of the aquatic resources	76
8. Subsistence strategies and cultural adaption to the environment	87
8.1. Intra-site diversity, homogeneity, variability and inferences on fishing techniques	87
8.1.1. The Mindoro sites	87
8.1.2. Here Sorot Entapa (HSE).....	88
8.1.3. Asitau Kuru	90
Fieldwork in Timor-Leste (June 2019)	90
8.1.4. Matja Kuru 2 and Laili.....	95
8.2. From Sunda to Sahul: a history of humans and the sea	96
8.3. Coastal adaptation and modernity: the exploitation of toxic fish in the Philippines	97
9. Conclusion and perspectives	99
Appendix: Ecological settings of identified fish taxa	103
The reef “specialists”	103
The “generalist” families	105
The “predators”: coastal and pelagic taxa.....	107
The freshwater taxa.....	109
Bibliography	111
