Acknowledgements	v
Contents	vii
List of Figures	xi
List of Tables	xv
Preface	xvii
Part I The Birth of Tatevalí (Grandfather Fire) and the Contest of Fire and Water (Nakawé)	1
Chapter 1 The First Landscape	3
Introduction	3
Aim	4
Purpose and Objectives	4
Background to Palaeoenvironmental Studies in the Ambato Valley	4
From Ashes to Microcharcoal	4
Outline of this Study	5
Chapters and landscape	6
Chapter 2 A Changing Landscape: The Theoretical Landscape and Methodological Approaches	7
Theoretical Methodologies and Theoretical Approaches	7
Conceptual framework (landscape/environment)	7
Fire	8
Perceptions of the World	9
The nature-culture (society) duality in the modern world	9
Perception of climate and weather	9
The Perception of Cultural Evolution in the Archaeology of Northwest Argentina	11
A materialist viewpoint in northwest Argentinean archaeology	12
Abandonment in Archaeology	13
Abandonment versus collapse	13
Concepts and scales in abandonment	14
Classic explanations of abandonment on a large scale	14
Floor assemblages	15
Evidence of fire and abandonment: accident, natural causes, or ritual practice?	15
Evidence of fire and abandonment in archaeological sites in northwest Argentina	16
Chapter 3 A Landscape in Constant Change – the Aguada Culture	19
The Aguada in the Ambato Valley	19
Background	19
Research in the Ambato Valley since the 1990s	20
Integration, trade routes and “cebil”	20
González’s view of the disappearance of the Aguada culture	21
Chapter 4 The Landscape in the Ambato Valley	23
Introduction	23
Environmental setting – the Ambato Valley	23
Geology	24
The natural environment	24
Modern threats to the area	26
Environmental History in the Region – From a Regional to a Local Perspective	26
Variations in moisture and the palaeoenvironmental data from the Ambato Valley	27
The Ambato Valley – A Cultural Construction	28
The archaeological landscape in the Ambato Valley	28
Chronology of some archaeological sites in the Ambato Valley	31
The Archaeological Sites with Evidence of Fire in the Ambato Valley	31

La Rinconada a.k.a. La Iglesia de Los Indios	31
Structures with evidence of fire (E4, E5, E7, and E15)	32
Martínez 2 (CatAmb002)	33
Piedras Blancas	36
Piedras Blancas: Compound H (Recinto Alto)	38
Piedras Blancas: Compound F and G	40
Chapter 5 A Landscape on Fire	51
Fire Ecology	51
The nature of the fires	51
Fire in ecosystems	51
Fire behaviour	52
Fuel	52
Meteorological factors	52
Biomass Burning in the Past: A Global Context	53
Fire and humans	53
Post-fire effects	54
Fire and Effects on the Ecosystem: How to Discover Traces of Fire in the Past?	54
The effect of fire on some trees in the Ambato Valley	54
Fire in the Ambato Valley: December 2009	54
Present-day Biomass Calculations and Modelling for the Ambato Valley	58
Chapter 6 Tools to Construct a Landscape	61
Environmental Archaeology	61
Environmental Determinism in Archaeology	61
Reconstruction of Palaeoenvironments	62
Different scales in the reconstructions	62
Climate, Palaeoclimate, and Proxies in the Reconstruction of Palaeoenvironments	62
Pollen as a proxy in palaeoenvironmental reconstruction	63
Pedoanthracology and Microcharcoal as a Proxy	63
Proxy representation	63
Local or regional source	64
The preservation of pollen and microcharcoal	64
Interpretation	64
Reflections	64
Part II Microcharcoal in the Ambato Valley	67
Chapter 7 Reconstructing a Landscape with Microcharcoal	69
Microcharcoal	69
Background	69
Fire events and the archaeology of the Ambato Valley	69
Application in archaeology and paleoenvironmental studies	69
History and background	70
Charcoal formation	70
Charcoal taphonomy and preservation	70
Microcharcoal and experimentation	71
Methodological issues concerning microcharcoal and the reconstruction of fire events	71
Counting methods	71
Some problems with the sampling in the field	72
Materials and Methods	72
Profile 1 – The First Analysis	72
Sampling of Profile 1 in the field	72
Reference collection in Córdoba	73
In the laboratory	74
Results for Profile 1	74
Reference collection in Córdoba with sediment corer	75
The Stations in the Ambato Valley – First Estimation of Presence/Absence of Microcharcoal	76
In the field	76
Location of the stations	77

Collection of reference soil samples	79
Field sampling of sediments	79
In the laboratory	80
Analysis of the samples	80
Preparation of the samples	82
Results of the Presence/Absence Study	82
Discussion of the Presence/Absence Study	87
Conclusions of the First Study of Presence/Absence	88
Quantification of Microcharcoal Content	89
Testing the samples with polarized light	89
Results	89
Analysis and Discussion of Microcharcoal Quantities	93
Conclusions: The Past Fire Regimes in the Ambato Valley	97
Multivariate Analysis of Data Obtained from the 17 Stations	99
Appendix to Chapter 7	101
Section I: Description of the Stations	101
Station 1 (Córdoba)	101
Station 2 (Córdoba)	101
Station 3 (Córdoba)	101
Station 4 (Córdoba)	101
Station 5 (Córdoba)	101
In the Ambato Valley	101
Station 1	101
Station 2	102
Station 3	102
Station 4	103
Station 5 and Station 5(bis)	103
Station 6	104
Station 7	104
Station 8	104
Station 9	105
Station 10	105
Station 11	105
Station 12	105
Station 13	106
Station 14	106
Station 15	106
Station 16	107
Station 17	107
Section II: Sediment Data from all Stations in the Ambato Valley	108
Section III: Data from the Analysis of the Samples from Stations in the Ambato Valley	115
Chapter 8 The Complementary Landscape	123
Radiocarbon Dating in the Ambato Valley	123
Radiocarbon dating of the soil samples	124
Phosphate, Magnetic Susceptibility, Organic Material (LOI), and pH	125
Introduction	125
Previous studies of phosphate and organic material from archaeological sites in the Ambato Valley	126
Soil formation	126
Aim and purpose	128
Materials and Methods	128
Locations of the stations	128
Sediment extraction in 2008	128
Sediment extraction in 2010	128
In the laboratory	128
Spot test of phosphate content	128
Phosphate analysis (cit-P, CitPOI and PQ)	129
Magnetic susceptibility (MS)	129
Loss on ignition (LOI)	129

pH	129
Results	130
Discussion	134
Conclusions	135
Geochemical Study of Stations 4, 11 and 16 of the Ambato Valley	135
Conclusions	138
Part III Discussion	141
Chapter 9 An Abandoned Landscape or a Society in Disintegration?	143
Key Factors Present for Fire in the Ambato Valley	143
The Recurring Fires in the Ambato Valley	144
The Perception of Fire	144
Fire in the Agricultural Terraces	145
Disintegration or Abandonment of the Ambato Valley	145
The End of the Aguada Occupation in the Ambato Valley	146
Disasters or Collapse?	146
Drought in the Final Phase of the Occupation	147
Wildfires and the Abandonment	148
Fire and Ritual Abandonment of Structures	149
Abandonment Patterns and Floor Assemblages	150
The Difference between the Abandonment of the Hualfin Valley and the Ambato Valley	150
Violence and Abandonment of the Ambato Valley	151
Indicators of Violence in the Aguada Culture	151
Final Words and Future Directions	154
References	157
Appendix: Ashes of Disintegration	171
Microfossils and Ashes Applied to Archaeological and Anthracological Issues	171
Introduction	171
Aim	171
Background – ashes in archaeology	171
Soil morphology	171
Reference collection	172
Materials and Methods	172
Results	172
Discussion	175
