List of Figures	xi
List of Tables	xvi
Abstract	xxi
1. Introduction	1
1.1. Introduction	1
1.2. Structure of the Book	2
2. Theoretical Framework	3
2.1. Background on Neanderthal behaviour	3
2.2. Distribution of Neanderthal fossil evidence in Iberia	5
2.3. The Mousterian variability debate	9
2.4. Iberia palaeoenvironmental framework during Upper Pleistocene	15
2.5. The geographic and geological framework of the Iberian Peninsula.....	18
3. Objectives	23
3.1. Hypothesis to be tested	23
3.2. Research questions.....	23
3.2.1. Regarding Neanderthal technical behaviour.....	23
3.2.2. Regarding Neanderthal subsistence practices.....	23
3.2.3. Regarding Neanderthal bioclimatic occupation patterns	23
4. Research Design and Methodology	25
4.1. Selection of chronological period, regions, sites and assemblages to study.....	25
4.1.1. Chronological period	25
4.1.2. Selecting specific regions.....	25
4.1.3. Selecting specific sites and assemblages.....	27
4.2. Data collection methods.....	29
4.2.1. Lithic assemblages	29
4.2.2. References database.....	29
4.2.3. Middle Palaeolithic sites fauna database	29
4.2.4. Bioclimatic and archaeological sites database.....	29
4.3. Methods of data analysis.....	33
4.3.1. Technological analysis of the lithic record	33
5. Neanderthal Technological Behaviour	41
5.1. Introduction.....	41
5.2. Analyses of Mousterian lithic assemblages from Cantabrian region	41
5.2.1. Axlor Cave	41
5.2.2. Esquilleu Cave	58
5.2.3. Morin Cave	74
5.2.4. El Castillo Cave	88
5.3. Analyses of Mousterian lithic assemblages from the Betic region	103
5.3.1. Abrigo 3 (Yacimientos Arqueológicos De La Araña, Málaga).....	103
5.3.2. Carihuela Cave.....	116
5.3.3. Zafarraya Cave.....	126
5.3.4. Gorham’S Cave.....	138
5.4. Comparison between lithic assemblages from Betic and Cantabrian regions	153
5.4.1. Raw Material.....	153
5.4.2. Technical categories from cores, flakes and retouched tools.....	159
5.5. Summary.....	185
6. Neanderthal Subsistence	191
6.1. Introduction.....	191
6.2. Large Game.....	193

6.2.1. Faunal assemblages from Cantabrian region	194
6.2.2. Faunal assemblages from Betic region	201
6.2.3. Biogeographical faunal analysis	206
6.3. Cannibalism	208
6.4. Small Game.....	209
6.4.1. Rabbits	210
6.4.2. Tortoise.....	212
6.4.3. Marine resource exploitation	213
6.4.4. Fish.....	215
6.4.5. Avifauna	217
6.5. Plants.....	220
6.6. Summary	222
7. Bioclimatic Occupation Patterns	227
7.1. Introduction.....	227
7.2. Principles of Bioclimatic maps	227
7.3. Archaeological sites dataset	229
7.3.1. Mousterian sites	229
7.3.2. Châtelperronian sites.....	235
7.3.3. Aurignacian sites.....	235
7.3.4. Gravettian sites.....	236
7.3.5. Solutrean sites	236
7.4. Archaeological sites scattered within the bioclimatic belt.....	237
7.4.1. Thermotype	237
7.4.2. Ombrotype	242
7.5. Summary	247
8. Conclusions.....	251
8.1. General Conclusions	251
8.1.1. Introduction.....	251
8.1.2. Technological behaviour	251
8.1.3. Subsistence practices	252
8.1.4. Bioclimatic occupation patterns.....	252
8.2. Future avenues of research.....	253
8.3. Final Conclusions.....	253
References	255
