List of Figures.....	xi
List of Tables.....	xviii
1. The historical context and importance of Bamburgh	1
<i>Graeme Young, Joanne Kirton and Barbara Yorke</i>	
1.1. Introduction.....	1
1.2. Site location and topographical context.....	3
1.3. Written sources and the Early Medieval history of Bamburgh c. 500–800 (Barbara Yorke).....	4
1.3.1. Bamburgh and the Bernician Royal House	6
1.3.2. Bamburgh as fortress.....	8
1.3.3. The people of the Bamburgh fortification	9
1.3.4. Conclusion.....	11
1.4. Archaeological background of Bamburgh	12
1.4.1. The Bamburgh vill.....	12
1.5. Previous investigations at the Bowl Hole	13
1.5.1. Circumstances around the discovery of the Bowl Hole cemetery.....	13
1.5.2. Antiquarian and early archaeological interest	13
1.5.3. Brian Hope-Taylor’s investigations in the area	14
1.6. Structure of the volume.....	15
1.7. Reburial of the human remains recovered from the Bowl Cemetery (1998–2007).....	16
2. Excavations within and around the castle	17
<i>Graeme Young, Joanne Kirton and Sarah Groves</i>	
2.1. Antiquarian and later investigations within the castle.....	17
2.2. Modern investigations within the castle by the Bamburgh Research Project 2000 to present	19
2.2.1. BRP Trench 1	19
2.2.2. BRP Trench 3	21
2.2.3. The Inner Ward.....	25
2.2.4. Environmental information for Bamburgh	26
2.3. Modern excavations at the Bowl Hole	26
2.3.1. Excavation methodology and recording.....	28
2.3.2. Non burial features	28
2.3.3. Geophysical survey 2006	29
2.3.4. The extent of the Bowl Hole cemetery.....	31
3. The cemetery catalogue	35
<i>Sarah Groves, Charlotte A. Roberts and Sam Lucy</i>	
3.1. Introduction.....	35
3.2. Cemetery catalogue.....	35
4. Life and death at Bamburgh: stories from the skeletons	111
<i>Charlotte A. Roberts and Sarah Groves, with tables and charts prepared by Sophie Newman</i>	
4.1. Introduction and background	111
4.2. How well preserved were the skeletons?	112
4.3. Minimum number of individuals excavated	113
4.4. Sex and age at death distribution	113
4.4.1. Sex estimation	114
4.4.2. Age estimation.....	114
4.5. Normal variation: how similar or different was the population to one another and other contemporary populations?	117
4.5.1. Metrical analysis.....	117
4.5.2. Skeletal and dental non-metric traits.....	120
4.6. Health, disease and well-being.....	125
4.6.1. Congenital conditions/disorders/congenital malformations/birth defects.....	126
4.6.2. Dental disease and dental anomalies.....	128

4.6.3. Joint disease.....	134
4.6.4. Trauma.....	139
4.6.5. Infectious disease	148
4.6.6. Metabolic related conditions	156
4.7. Comparison of the Bowl-Hole people with those buried in contemporary cemetery sites in England	160
4.7.1. Comparing the Bowl Hole skeletons with other cemetery sites	160
5. Cemetery development and burial practice	167
<i>Sam Lucy</i>	
5.1. Introduction.....	167
5.2. The buried population	167
5.3. Stratigraphy, possible multiple burials and deliberate burial disturbance.....	167
5.4. Material culture discussion and dating with Ian Riddler	169
5.4.1. Pin.....	169
5.4.2. Pendant.....	169
5.4.3. Combs.....	170
5.4.4. Knives.....	172
5.4.5. Buckles	172
5.4.6. Other grave-goods	172
5.4.7. Other deliberate deposits	172
5.5. Radiocarbon dating	172
5.6. Phasing the cemetery.....	177
5.7. Other aspects of layout.....	179
5.7.1. Grave size and shape	179
5.7.2. Grave structures.....	179
5.7.3. Body position	180
5.7.4. Orientation.....	183
5.7.5. Grave-good assemblages.....	184
5.7.6. Food offerings, other animal remains, worked flint and shell	185
5.8. The Bamburgh population.....	185
6. Mobility and diet of the Bamburgh population	187
<i>Sam Lucy, Darren R. Gröcke and Geoff Nowell, with a contribution by Jane Evans</i>	
6.1. Introduction.....	187
6.2. Using strontium and oxygen to study population origins and migration in Early Medieval cemeteries	187
6.3. Using carbon and nitrogen to study diet in Early Medieval cemeteries	188
6.4. Identifying the local signatures for strontium and oxygen: proxy sampling	188
6.5. Stable isotope analyses: methods	194
6.5.1. Strontium and oxygen	194
6.5.2. Carbon and nitrogen	194
6.6. Stable isotope analysis: results.....	195
6.6.1. Strontium and oxygen	195
6.6.2. Carbon and nitrogen	200
6.7. Interpreting the results ten years on	203
6.7.1. Problems with identifying non-locals and possible solutions	203
6.7.2. A new approach to identifying ‘local’ strontium values at Bamburgh by Jane Evans	205
6.7.3. Reconsidering the Bamburgh data	206
6.8. Multi-isotope analyses	210
6.9. The Bamburgh population: (non)comparison with other studies.....	214
6.10. The pilot aDNA study	219
7. Exploring variation in the buried population	221
<i>Sam Lucy and Charlotte A. Roberts</i>	
7.1. Population analysis by phase	221
7.1.1. Isotopic data	221
7.1.2. Stature.....	223
7.1.3. Non-metric traits.....	226
7.1.4. Congenital, developmental and genetic-related conditions.....	227

7.1.5. Acquired diseases	228
7.1.6. Trauma.....	232
7.1.7. Infectious diseases.....	233
7.1.8. Metabolic-related conditions.....	234
7.1.9. Did diet have an impact on health?	236
7.2. Identifying associations.....	237
7.3. Do the burial groups suggest possible relationships?	242
7.4. Other potential population groups within the cemetery.....	248
7.4.1. Weapons and warriors	248
7.4.2. Craft activities	249
7.4.3. Outliers? The prone and crouched burials.....	249
7.5. Discussion	250
7.5.1. The population.....	250
7.5.2. Burial practices.....	251
7.5.3. Bamburgh in a Northumbrian context.....	252
Appendix 1. Example of adult skeletal recording form (available online at: https://doi.org/10.30861/9781407363271-Appendix1).....	255
Appendix 2. Permanent and deciduous tooth positions present.....	257
Appendix 3. Permanent and deciduous teeth present	257
Appendix 4. Number of permanent and deciduous teeth and tooth positions affected by caries, calculus, abscess, antemortem tooth loss, and enamel hypoplasia.....	259
Appendix 5. Individuals with dental anomalies	261
Appendix 6. Skeletons with evidence of trauma	263
Appendix 7. Isotopic methods for oxygen and strontium analyses	265
Bibliography	267
