

# Contents

<b>List of Figures.....</b>	<b>xi</b>
<b>1. Megalithism in the Llobregat River Basin.....</b>	<b>1</b>
1.1. Introduction.....	1
1.2. Working hypothesis and objectives .....	1
1.3. Geographic characterization of the study area.....	3
1.4. Typological characterization.....	4
1.5. History of research in the northeast of the Iberian Peninsula.....	5
1.6. Llobregat river basin megalithic constructions.....	8
<b>2. Methodology .....</b>	<b>15</b>
2.1. Registration methodology.....	15
2.1.1. Fieldwork: data collection.....	15
2.1.1.1. Coordinates .....	15
2.1.1.2. Metric data .....	15
2.1.1.3. Orientation.....	15
2.1.1.4. Photographic record .....	15
2.1.1.5. Degree of preservation .....	16
2.1.2. Data management: creation of specific database .....	17
2.2. Geographic Information Systems methodology .....	17
2.2.1. ArcGIS ESRI.....	17
2.2.2. Projected coordinate system .....	18
2.2.3. Graphic representation element: the point .....	18
2.2.4. Layers in raster and vector formats.....	18
2.2.5. Digital elevation model or digital surface model.....	19
2.3. Methodology applied to spatial analysis variables .....	20
2.3.1. Topographic analysis.....	20
2.3.1.1. Topographic Prominence Index (TPI).....	20
2.3.1.2. Slope calculation .....	21
2.3.1.3. Position on the Slope.....	21
2.3.2. Principle of randomness.....	22
2.3.3. Cost area.....	22
2.3.4. Visibility.....	23
2.3.5. Livestock and transhumance paths .....	25
2.3.6. Hydrographical Network .....	26
2.3.7. Orientation of megalithic constructions.....	27
2.3.8. Altitude Measurement.....	28
2.3.9. Lithology.....	28
2.3.10. Work investment .....	29
2.3.11. Density .....	30
2.4. Statistical treatment .....	30
<b>3. GIS Analysis of the Megalithic Constructions in the Llobregat River Basin.....</b>	<b>33</b>
3.1. Topographical analysis .....	33
3.1.1. Unreclassified topographic prominence index (TPI).....	33
3.1.2. Topographic prominence index (TPI) reclassified and overrepresentation index.....	37
3.1.3. Terrain slope.....	39
3.1.4. Slope situation.....	44
3.2. Visibility.....	46
3.2.1. Cost distance calculation.....	46
3.2.2. Cost area and visual control .....	47
3.2.3. Visual interconnexion and proximity relations .....	55
3.3. Livestock and transhumance paths .....	61

3.3.1. Proximity study.....	61
3.3.2. Visibility study of the megaliths towards the paths .....	65
3.4. Hydrographical network .....	69
3.4.1. Proximity study.....	69
3.4.2. Visibility study of the megaliths towards the rivers.....	72
3.5. Altimetric level .....	73
3.6. Lithology.....	79
3.7. Global statistical discussion.....	81
<b>4. Analysis of Architectural Data in the Llobregat River Basin .....</b>	<b>89</b>
4.1. Entrance orientation.....	89
4.2. Work investment .....	91
4.2.1. Work investment of the chamber and corridor.....	91
4.2.2. Work investment of the mound structure.....	94
4.2.3. Correlation of the work investment of the chamber and corridor and mound structure.....	96
4.3. Global statistical discussion.....	98
<b>5. Definition and Group Analysis.....</b>	<b>105</b>
5.1. Group definition.....	105
5.1.1. Cardener river group .....	107
5.1.2. Calders stream group .....	109
5.1.3. Medium-high section of the Llobregat river.....	110
5.1.4. Isolated megalithic constructions.....	112
5.1.4.1. Megalithic constructions of the north of the Llobregat river.....	112
5.1.4.2. Isolated megalithic constructions of the Anoià river.....	114
5.2. Cardener river group: geographic analysis .....	115
5.2.1. Topographic analysis.....	115
5.2.2. Visibility.....	116
5.2.3. Livestock and transhumance paths .....	117
5.2.4. Hydrographic network .....	118
5.2.5. Altimetric level.....	119
5.2.6. Lithology.....	119
5.3. Cardener river group: architectural analysis.....	119
5.3.1. Entrance orientation.....	119
5.3.2. Work investment .....	120
5.4. Calders stream group: geographic analysis .....	121
5.4.1. Topographic analysis.....	121
5.4.2. Visibility.....	122
5.4.3. Livestock and transhumance paths .....	123
5.4.4. Hydrographic network .....	124
5.4.5. Altimetric level.....	124
5.4.6. Lithology.....	125
5.5. Calders stream group: architectural analysis .....	125
5.5.1. Entrance orientation.....	125
5.5.2. Work investment .....	125
5.6. Discussion.....	126
5.7. Statistical discussion.....	127
5.7.1. Cardener river group .....	128
5.7.2. Calders stream group .....	128
<b>6. Analysis by Architectural Types .....</b>	<b>133</b>
6.1. Cists .....	133
6.1.1. Topographic analysis.....	135
6.1.2. Visibility.....	136
6.1.3. Livestock and transhumance paths .....	136
6.1.4. Hydrographic Network .....	136
6.1.5. Altimetric level.....	137
6.1.6. Lithology.....	137
6.1.7. Axis orientation.....	137
6.1.8. Work investment .....	138

6.1.9. Global statistical analysis of cists .....	139
6.2. Simple chambers.....	141
6.2.1. Topographic analysis.....	143
6.2.2. Visibility.....	144
6.2.3. Livestock and transhumance paths .....	145
6.2.4. Hydrographic network .....	145
6.2.5. Altimetric level.....	145
6.2.6. Lithology.....	146
6.2.7. Entrance orientation .....	147
6.2.8. Work investment .....	147
6.2.9. Statistical discussion .....	148
6.3. Catalan Galleries.....	150
6.4. Conclusions.....	152
<b>7. Megalithism, a Source of Social and Spatial Information.....</b>	<b>153</b>
7.1. Discussion.....	153
7.1.1. Discussion of topographical variables .....	153
7.1.1.1. Topographic prominence index, inclination and position .....	153
7.1.1.2. Altimetric level.....	154
7.1.1.3. Lithology .....	154
7.1.2. Discussion of visibility and proximity variables .....	155
7.1.2.1. Visibility .....	155
7.1.2.2. Proximity analysis.....	155
7.1.3. Discussion of architectural variables .....	156
7.1.3.1. Orientation of the chamber entrance.....	156
7.1.3.2. Work investment: chamber and corridor.....	157
7.1.3.3. Work investment: mound structure .....	157
7.1.4. Discussion of the compliance with standard parameters .....	157
7.1.5. Discussion of materials and relative chronology .....	158
7.2. Historical discussion.....	162
7.3. From geographical space to social space: first approach.....	167
